tried and true Smack!

\$13⁰⁰**Why I use three different sizes of rackets in 7th grade PE.**

Incorporating three different sizes of badminton rackets in physical education caters to the diverse needs and abilities of my students. This makes the game of badminton more accessible, enjoyable, and conducive to skill development. Students who might initially struggle with a standard-sized racket can use a smaller one to build confidence, leading to increased motivation and participation. Providing various racket sizes allows a student to choose the tool that complements their unique abilities, fostering a sense of personalization in their gameplay. Dana - Physical Education and Health Teacher
